Table of Contents
Corrosion, Vol. 29, 1973

January

Investigation of Stress Corrosion Cracking Susceptibility of Fe-Ni-Cr Alloys in Nuclear Reactor Water Environments
W. L. Clarke and G. M. Gordon 1

Inhibition of Corrosion Fatigue in 7075 Aluminum Alloys
R. E. Stoltz and R. M. Pelloux 13

Composition of Anolyte Within Pit Anode of Austenitic Stainless Steels in Chloride Solution
T. Suzuki, M. Yamabe, and Y. Kitamura 18

Lattice Dilatation and Hydrogen Embrittlement Cracking
B. C. Syrett 23

Cathodic Protection to Prevent Crevice Corrosion of Stainless Steels in Halide Media
J. F. Bates 28

Temperature as a Pitting Criterion
R. J. Brigham and E. W. Tozer 33

Action of Carbon in Stress Corrosion Cracking of Mild Steel in Nitrate Solutions
J. Flis 37

February

Mechanisms of Stress Corrosion Cracking of Titanium-Aluminum Alloys in Methanol-HCl Solutions
C. J. McMahon, Jr. and D. J. Truax 47

Technical Note: Galvanic Interaction Between Active and Passive Titanium
Florian Mansfeld 56

Passivity of Zirconium in Sulfuric Acid Solutions–Effect of Cathodic Pretreatment
K. Elayaperumal, S. S. Chouthai, and J. Balachandra 59

Technical Note: Further Observations on the Electrochemical Behavior of Ti-Ni Alloys in Acidic Chloride Solutions
A. J. Sedriks 64

Tube Electrodes for Stress Corrosion Cracking and Hydrogen Permeation Studies in High Temperature Water
R. L. Jones 66

An Electrochemical Testing Method for Stress Corrosion Cracking by Separating Crack Anode from Cathode
Tsuguo Suzuki, Minoru Yamabe, and Yoshiharu Kitamura 70

Corrosion of Metals by Liquid Bismuth-Tellurium Solutions
W. R. Kanne, Jr. 75

March

Science and Technology in the Service of Society
Norman Hackerman 85

The Effect of Exposed Nonmetallic Inclusions on Corrosion Resistance of Type 304 Stainless Steel in a Simulated Pressurized Water Reactor Environment
Fred F. Lyle, Jr. 86

Role of the Alloying Elements at the Steel/Rust Interface
R. Bruno, A. Tamba, and G. Bombara 95

On the Growth of Corrosion Cracks
G. P. Cherepanov, L. V. Ershov, and G. G. Kuzmin 100

Technical Note: Benzotriazole as Corrosion Inhibitor for Copper. II. Acid NaCl Solutions
Florian Mansfeld and Tennyson Smith 105

Technical Note: Effect of High Dislocation Density on Stress Corrosion Cracking and Hydrogen Embrittlement of Type 304L Stainless Steel
M. R. Louthan, Jr., J. A. Donovan, and D. E. Rawl, Jr. 108

Cracking of Ti-6Al-4V in Methanol Solutions Containing Sulfates
E. G. Haney and Paul Fugassi 112

Fluoride Salt Corrosion and Mass Transfer in High Temperature Dynamic Systems
J. W. Koger 115

April

Electrochemical Measurements of Corrosion Processes in a Boiling Water Nuclear Reactor
R. L. Cowan and A. I. Kaznoff 123

Potter-Mann and Bloom Iron Oxide Films Grown on Mild Steel in 280 C 5N NaOH: Their Significance in Pitting
R. L. Jones 133

The Effect of Organic Lewis Bases on the SCC of AISI 4340 Steel Foil in Aqueous Acid Solutions
Paul Fugassi and E. G. Haney 140

Some Effects of ClO_4^- Ions on the Stability of Anodic Films Formed on Mild Steel
James P. Hoare and Kao-Wen Mao 143

Technical Note: Influence of Cold Work on the Stress Corrosion Susceptibility of Ti-13V-11Cr-3Al
J. W. Munford and H. J. Rack 146

Corrosion in Dilute Acids. Part I. A Modified Linear Polarization Technique
A. C. Makrides 148

Technical Note: Stress Corrosion Cracking of Aged U-4.5 Wt% Nb
James M. Macki and Robert L. Kochen 153

Stress Corrosion Cracking of Zircaloy-2 in Neutral Aqueous Chloride Solutions at 25 C
B. Cox 157

May

Predicting the Atmospheric Corrosion Behavior of Steel in an Industrial Environment
R. A. Legault, S. Mori, and H. P. Leckie 169

Corrosion in Dilute Acids Part II. Mild Steel in Dilute Phosphoric Acid Containing a Food Additive
A. C. Makrides 180

Corrosion Inhibition of Iron and Copper in Chloride Solutions by Benzotriazole
Robert J. Chin, Dan Altura, and Ken Nobe 185

Corrosion Behavior of Titanium in HCl
N. T. Thomas and Ken Nobe 188

Solid Cadmium Cracking of Titanium Alloys
D. A. Meyn 192

A Quantitative Model of Hydrogen Induced Grain Boundary Cracking
H. P. van Leeuwen 197

A Test Procedure to Evaluate the Relative Susceptibility of Materials to Stress Corrosion Cracking
D. L. Dull and L. Raymond 205

June

An Electrochemical Evaluation of 1100, 5052, and 6063 Aluminum Alloys for Desalination
R. A. Bonewitz 215

Corrosion in Dilute Acids Part III. Corrosion Kinetics and Effect of Cold Work
A. C. Makrides and F. Cocks 223

The Oxidation of Iron as Studied by Conversion Electron Mössbauer Spectroscopy
G. W. Simmons, E. Kellerman, and H. Leidheiser, Jr. 227

The Mini Potentiostat: A Versatile Power Source for Electrochemical Studies
N. D. Greene, G. A. Moebus, and M. H. Baldwin 234

Selective Corrosion of Stressed AISI 304L-Type Steel in a 5N H_2SO_4-0.1N NaCl Environment
Antero Honkasalo 237

Hydrogen Embrittlement and Stress Corrosion Cracking in Ti-Al Binary Alloys
D. A. Mauney, E. A. Starke, Jr., and R. F. Hochman 241

On the Shape of Some Polarization Curves in the Vicinity of the Corrosion Potential
G. Palombarini, L. Felloni, and G. P. Cammarota 245

Role of Stress in the Stress Corrosion Cracking of a Mg-Al Alloy
W. R. Wearmouth, G. P. Dean, and R. N. Parkins 251

July

Fractography of Stress Corrosion in Ti-8Al Tested in Fatigue
R. J. H. Wanhill 261

Stress Corrosion of Ferritic and Martensitic Stainless Steels in Saline Solutions
M. F. McGuire, A. R. Troiano, and R. F. Hehemann 268

The Range of Validity of the Linear Polarization Method for Measurement of Corrosion Rates
Rodney L. LeRoy 272

Galvanic Corrosion of Al Alloys Coupled to Coated PH13-8Mo Stainless Steel
Florian Mansfeld 276

Detection of Surface Contamination by Corrosion Printing
Robert J. Picard and Norbert D. Greene 282

Advances in Technology of Corrosion Resistant Silicate Mortars
G. W. Read, Jr. and F. M. Veater 285
Benzotriazole as a Corrosion Inhibitor for Immersed Copper
R. Walker 290

August

Influence of Preloading on the Sustained Load Cracking Behavior of Maraging Steels in Hydrogen
Otakar Jonas 299
On the Theory of Crack Growth Due to Hydrogen Embrittlement
Genady P. Cherepanov 305
Stress Corrosion Cracking Behavior of ASTM A517 Grade F Steel in Liquid Ammonia Environments
B. E. Wilde and D. C. Deegan 310
Fractography of Stress Corrosion Cracks in Aluminum Alloy 7075
W. J. Helfrich 316
Effect of Chloride Ion Concentration on the Anodic Dissolution Behavior of Nickel
M. B. Ives and M. Zamin 319
Stress Corrosion of α-Brass in an Acid Sulfate Solution
H. W. Pickering and P. J. Byrne 325
Pitting Potential Measurements by Means of the Static Potential Band Method
A. A. Seys and A. A. Van Haute 329

September

The Role of Carbon, Nitrogen, and Heat Treatment in the Dissolution of Iron-Chromium Alloys in Acids
Michael A. Streicher 337
Twenty-Year Inhibition of Corrosion by the Pertechnetate Ion
G. H. Cartledge 361
Discussion of a Correlation of Phase Change with Stress Corrosion Fracture in Alpha-Brass
Desmond Tromans 363
Exfoliation Corrosion of 7075 Aluminum Die Forgings
James V. Rinnovatore, Karl F. Lukens, and John D. Corrie 364

October

Effect of Aging on the Anodic Behavior of Ni-Cr-Mo Alloys
F. G. Hodge 375
Discussion: Chemistry of Grain Boundaries and Its Relation to Intergranular Corrosion of Austenitic Stainless Steel
Marshall H. Brown 384
Factors Controlling the Corrosion Behavior of Titanium and Titanium-Nickel Alloys in Saline Solutions
J. A. S. Green and R. M. Latanision ..386
The Effect of Molybdenum on the Corrosion Behavior of Iron-Chromium Alloys
M. B. Rockel 393
Tafel Slopes and Corrosion Rates from Polarization Resistance Measurements
Florian Mansfeld 397
The Relationship Between Galvanic Current and Dissolution Rates
Florian Mansfeld 403
A Study of Cathodic Polarization and pH Changes in Metal Crevices
M. H. Peterson and T. J. Lennox, Jr. .406

November

Effect of Ni Additions Upon the Stress Corrosion of Ferritic Steels in a Chloride Environment
B. S. Poulson and R. N. Parkins 414
Vapor Pressure of Liquid Sodium Sulfate from 954 to 1204 C
R. E. Fryxell, C. A. Trythall, and R. J. Perkins 423

Role of pH on the Stress Corrosion Cracking of Titanium Alloys
M. Inam Khokhar, F. H. Beck, and M. G. Fontana 429
Technical Note: Activation Energy for the Corrosion of Iron in H_2SO_4
Dan Altura and Ken Nobe 433
Fractographic Interpretation of Subcritical Cracking in a High Strength Titanium Alloy (IMI 550)
R. J. H. Wanhill 435
Stress Corrosion Cracking of Iron and Nickel Base Alloys in Sulfate Solutions at 289 C
David A. Vermilyea 442

December

Stress Corrosion Cracking of Sensitized Stainless Steel in Oxygenated High Temperature Water
Warren E. Berry, Earl L. White, and Walter K. Boyd 451
Sensitization of Wrought High Nickel Alloys
M. H. Brown and R. W. Kirchner 470
A Hydrodynamic Analog of Polarization Processes
J. E. Reinoehl 475

A

ACID
- Chloride solutions, benzotriazole as corrosion inhibitor of iron, May (185)
- Chloride solutions, corrosion behavior of Ti in, Oct (386)
- Chloride solutions, electrochemical behavior of Ti-Ni alloys in, Feb (64)
- Dilute, corrosion in, May (180)
- Dilute, corrosion in, Jun (223)
- Effect of organic Lewis bases on SCC of steel foil in aqueous solutions, Apr (140)
- Hydrochloric, corrosion behavior of titanium in, May (188)
- Hydrochloric, SCC of Ti in, Nov (429)
- Nitric, sensitivity in detecting changes in composition structures resulting from heat treatments, Sep (337)
- Phosphoric, dilute, containing food additive, corrosion of mild steel in, May (180)
- Role of carbon, nitrogen, and heat treatment in the dissolution of iron-chromium alloys in, Sep (337)
- Sodium chloride, benzotriazole as inhibitor for copper in, Mar (105)
- Sulfate solution, stress corrosion of alpha-brass in, Aug (325)
- Sulfuric, activation energy for corrosion of Fe in, Nov (433)
- Sulfuric, effect of cathodic pretreatment on passivity of zirconium in, Feb (59)
- Sulfuric, effect of chromium on general corrosion in oxidizing and reducing, Sep (337)
- Sulfuric, SCC of Ti in, Nov (429)
- Sulfuric, stressed AISI 304 L-type steel, selective corrosion in, Jun (237)

Activation energy for corrosion of Fe in H_2SO_4, Nov (433)

Aging, effect on anodic behavior of Ni-Cr-Mo alloys, Oct (375)

Aging time, cracking of Ti-6Al-4V in methanol solutions containing sulfates, Mar (112)

Alloying elements, role at steel/rust interface, Mar (95)

Alpha-brass in acid sulfate solution, stress corrosion of, Aug (325)

ALUMINUM
- 1100, 5052, 6063, electrochemical evaluation for desalination, Jun (215)
- 7075 alloys, inhibition of corrosion fatigue in, Jan (13)
- 7075 die forging, exfoliation corrosion, Sep (364)
- 7075 , fractography of stress corrosion cracks in, Aug (316)
- Alloys coupled to coated PH13-8Mo stainless steel, galvanic corrosion of, Jul (276)
- Alloys, relationship between galvanic current and dissolution rates, Oct (403)
- Mg alloy, role of stress in SCC of, Jun (251)
- Pitting of 1100, 5052, 6063, Jun (215)
- SCC of titanium alloys in methanol-HCl solutions, Feb (47)
- Ti-6Al-4V, cracking in methanol solution, Mar (112)
- Ti-8Al tested in fatigue, fractography of stress corrosion, Jul (261)
- Ti binary alloys, hydrogen embrittlement and SCC, Jun (241)

Ammonia, liquid environments, SCC of ASTM A517 Grade F steel in, Aug (310)

Ammonium ion, stress corrosion of alpha-brass, Aug (325)

Analog, hydrodynamic, of polarization processes, Dec (475)

Anode, crack, separating from cathode for SCC, Feb (70)

Anode, pit, of austenitic stainless steels, composition of anolyte within, Jan (18)

Anodic dissolution behavior of nickel, effect of chloride concentration on, Aug (319)

Anodic dissolution, role in stress corrosion process, Aug (325)

Anodic films, formed on mild steel, effects of ClO_4^- ions on stability of, Apr (143)

ANODIC POLARIZATION
- Alpha-brass in acid sulfate solutions, Aug (325)
- Curves in mild steel, Jan (37)
- Zirconium, effect of cathodic pretreatment on passivity, Feb (59)

Anolyte, composition of, within pit anode of austenitic stainless steels in chloride solution, Jan (18)

Atmospheric corrosion behavior of steel in industrial environment, predicting, May (169)

Atmospheric corrosion, low alloy steels, Mar (95)

B

Bases, organic Lewis, effect on SCC of 4340 steel foil in aqueous acid solutions, Apr (140)

Benzotriazole as inhibitor for copper in acid NaCl solutions, Mar (105)

Benzotriazole as inhibitor for immersed copper, Jul (290)

Benzotriazole as inhibitor for iron and copper, May (185)

Bismuth-Tellurium, liquid solutions, corrosion of metals by, Feb (75)

Bloom oxide films on mild steel, significance in pitting, Apr (133)

Boiling water nuclear reactor, electrochemical measurements of corrosion processes in, Apr (123)

C

Cadmium, solid, cracking of titanium alloys, May (192)

Carbon action in SCC of mild steel in nitrate solutions, Jan (37)

Carbon concentration, effect on general corrosion, Sep (337)

Carbon, role in dissolution on iron-chromium alloys in acids, Sep (337)

Cathode, separating from crack anode for SCC, Feb (70)

CATHODIC POLARIZATION
- In metal crevices, Oct (406)
- Zirconium oxide film formation, Feb (59)

Cathodic pretreatment, effect on passivity of zirconium on sulfuric acid solutions, Feb (59)

Cathodic protection, effect on crevice corrosion, Oct (406)

Cathodic protection for prevention of crevice corrosion of stainless steels in halide media, Jan (28)

CHLORIDE
- Effect of Ni additions on stress corrosion of ferritic steels in, Nov (414)
- Ion concentration effect on anodic dissolution of nickel, Aug (319)
- Ions, effect on corrosion potential of titanium, Nov (429)
- Solution, composition of anolyte within pit anode of austenitic stainless steels in, Jan (18)
- Solutions, benzotriazole as inhibitor for iron and copper in, May (185)
- Solutions, neutral aqueous SCC of zircaloy-2, Apr (157)

CHROMIUM
- Concentration, effect on general corrosion, Sep (337)
- Depletion mechanism, Sep (337)
- Effect of aging on anodic behavior of Ni-Cr-Mo alloys, Oct (375)
- Iron alloys, in acids, role of carbon, nitrogen, and heat treatment in dissolution of, Sep (337)
- Mo, effect on corrosion behavior of Fe-Cr alloys, Oct (393)
- SCC of Fe-Ni-Cr alloys in nuclear reactor water environments, Jan (1)

Cold work, influence on stress corrosion susceptibility of Ti-13V-11Cr-3Al, Apr (146)

Contamination, surface, detection of by corrosion printing, Jul (282)

COPPER
- Benzotriazole as inhibitor, in chloride solutions, May (185)
- Benzotriazole as inhibitor, Mar (105)
- Immersed, benzotriazole as corrosion inhibitor for, Jul (290)

Corrosion fatigue, inhibition of in 7075 aluminum alloys, Jan (13)

Corrosion potential, May (185)

Corrosion printing for detection of surface contamination, Jul (282)

Corrosion rates from polarization resistance measurements, Oct (397)

Crack growth, due to hydrogen embrittlement, Aug (305)

Crack path, factors which influence in

hydrogen embrittlement cracking, Jan (23)
Cracking, active and passive titanium, Feb (56)
Cracking, grain boundary, hydrogen induced, quantitative model, May (197)
Cracking, solid cadmium, of titanium alloys, May (192)
Cracking, subcritical of high strength Ti alloy, Nov (435)
Cracking, sustained load, of maraging steels in hydrogen, influence of preloading on, Aug (299)
Cracking, Ti-6Al-4V in methanol solutions, Mar (112)
Cracking, titanium-aluminum alloys, Feb (47)
Cracks, fractography of stress corrosion in Ti-8Al tested in fatigue, Jul (261)
Cracks, growth of, Mar (100)
Crevice corrosion, effect of cathodic protection on, Oct (406)
Crevice corrosion, of stainless steels in halide media, prevention of by cathodic protection, Jan (28)
Crevice corrosion, stages of development, Jan (28)
Crevices, cathodic polarization and pH in, Oct (406)

D

Density, high dislocation, effect on SCC and hydrogen embrittlement of 304 stainless steel, Mar (108)
Desalination, electrochemical evaluation of aluminum alloys for, Jun (215)
Dissolution of iron-chromium alloys in acids, role of carbon, nitrogen and heat treatment, Sep (337)
Dissolution rates of Al alloys coupled to coated PH13-8Mo stainless steel, Jul (276)
Dissolution rates, relation to galvanic current, Oct (403)
Dynamic systems, high temperature, fluoride salt corrosion and mass transfer, Mar (115)

E

Electrochemical behavior of Ti-Ni alloys in acidic chloride, Feb (64)
Electrochemical evaluation of aluminum alloys for desalination, May (215)
Electrochemical measurements of corrosion in boiling water nuclear reactor, Apr (123)
Electrochemical processes, cause of crack growth, Mar (100)
Electrochemical studies with mini potentiostat, Jun (235)
Electrochemical testing method for SCC, Feb (70)
Electrodes, tube, for SCC and hydrogen permeation studies in high temperature water, Feb (66)
Exfoliation corrosion of 7075 aluminum die forgings, Sep (364)

F

Films, Potter Mann and Bloom oxide, significance in pitting, Apr (133)
Fluoride salt corrosion in high temperature dynamic systems, Mar (115)
Fractography of stress corrosion in aluminum alloy 7075, Aug (316)
Fractography of stress corrosion in Ti-8Al tested in fatigue, Jul (261)
Fractography of subcritical cracking in high strength Ti alloy, Nov (435)

G

Galvanic current, relation to dissolution rates, Oct (403)
Galvanic interaction between active and passive titanium, Feb (56)
Grain boundaries, chemistry of, relation to intergranular corrosion, Oct (384)
Grain boundary cracking, hydrogen induced, quantitative model, May (197)

H

Halide media, cathodic protection to prevent crevice corrosion of stainless steels in, Jan (28)
Heat treatment, effect on microstructure and morphology of corrosion, Sep (337)
Heat treatment, role in dissolution of iron-chromium alloys in acids, Sep (337)
Hydrodynamic analog of polarization processes, Dec (475)
HYDROGEN
- Embrittlement, 304 stainless steel, effect of high dislocation density, Mar (108)
- Embrittlement and lattice dilation, Jan (23)
- Embrittlement and SCC in Ti-Al binary alloys, Jun (241)
- Embrittlement, cause of crack growth, Aug (305)
- Embrittlement, SCC, Jan (23)
- Grain boundary cracking, quantitative model, May (197)
- Influence of preloading on sustained load cracking of maraging steels in, Aug (299)
- Permeation, SCC, tube electrodes for studies in high temperature water, Feb (66)
- Role in SCC process, Jun (241)

I

Inclusions, nonmetallic exposed, effect on corrosion resistance of stainless steel, Mar (86)
Inhibition by pertechnetate ion, Sep (361)
Inhibitor, benzotriazole, for copper in acid NaCl solutions, Mar (105)
Inhibitor, benzotriazole, for immersed copper, Jul (290)
Intergranular corrosion, effect of carbon content, Jan (37)
Intergranular corrosion of austenitic stainless steels, chemistry of grain boundaries relation to, Oct (384)
IRON
- Alloys, fluoride salt corrosion and mass transfer, Mar (115)
- Alloys in sulfate solutions, SCC, Nov (442)
- Benzotriazole as inhibitor, in chloride solutions, May (185)
- Chromium alloys, effect of heat treatment on weight loss of, Sep (337)
- Effect of carbon content on SCC, Jan (37)
- Fe-Cr alloys, effect of molybdenum on corrosion behavior of, Oct (393)
- Ferritic stainless steels, stress corrosion in saline solutions, Jul (268)
- In H_2SO_4, activation energy for corrosion, Nov (433)
- Oxidation, studied by conversion electron Mössbauer spectroscopy, Jun (227)
- SCC of Fe-Ni-Cr alloys in nuclear reactor water environments, Jan (1)

L

Lattice dilatation cracking, Jan (23)
Linear polarization method for corrosion rate measurement, range of validity, Jul (272)
Linear polarization technique, modified, for measuring corrosion in dilute acids, Apr (148)

M

Martensitic stainless steel in saline solutions, stress corrosion of, Jul (268)
Mass transfer in high temperature dynamic systems, Mar (115)
MECHANISM
- Chromium depletion, in dissolution of iron-chromium alloys in acids, Sep (337)
- Formation of river markings on Ti, Nov (435)
- Inhibition by pertechnetate ion, Sep (361)
- Inhibition of fatigue crack growth in aluminum alloys, Jan (13)
- Liquid metal embrittlement, Nov (435)
- O-H group in cracking of Ti-6Al-4V in methanol solutions containing sulfates, Mar (112)
- Passivation, in connection with electrochemical measurements, Oct (393)
- SCC of ASTM A517 F steel in liquid ammonia environments, Aug (310)
- SCC of mild steel in chloride environment, Nov (414)
- SCC of titanium-aluminum alloys in methanol-HCl solutions, Feb (47)
- SCC, role of hydrogen embrittlement, Jul (268)

Mercury, liquid, fractography of subcritical cracking of Ti in, Nov (435)
METALS, EXCEPTIONAL
- Molybdenum coated stainless steels, galvanic corrosion of Al alloys coupled to, Jul (276)
- Molybdenum containing stainless steels, temperature as pitting criterion in, Jan (33)

Molybdenum, effect on corrosion behavior of Fe-Cr alloys, Oct (393)
Molybdenum, Ni-Cr alloys, effect of aging on anodic behavior, Oct (375)
Nb, U-4.5 Wt%, aged, Apr (153)
U-4.5 Wt% Nb, aged, SCC, Apr (153)
Zirconium, effect of cathodic pretreatment on passivity of, Feb (59)
Zirconium oxide film formation, Feb (59)
Methanol solutions, cracking of Ti-6Al-4V, Mar (112)
Mg-Al alloy, role of stress in SCC of, Jun (251)
Molybdenum content of alloys related to temperature at which pitting initiates, Jan (33)
Mortars, silicate corrosion resistant, Jul (285)
Mössbauer spectroscopy, study of iron oxidation, Jun (227)

N

NICKEL
Additions, effect on stress corrosion of ferritic steels in a chloride environment, Nov (414)
Alloys, fluoride salt corrosion and mass transfer, Mar (115)
Alloys in sulfate solutions, SCC, Nov (442)
Chloride ion concentration, effect on anodic dissolution of, Aug (319)
Effect of aging on anodic behavior of Ni-Cr-Mo alloys, Oct (375)
Effect on corrosion resistance of Ti, Oct (386)
Electrochemical behavior of Ti-Ni alloys in acidic chloride solutions, Feb (64)
SCC of Fe-Ni-Cr alloys in nuclear reactor water environments, Jan (1)
Wrought high alloys, sensitization of, Dec (470)
Nitrogen concentration, effect on general corrosion, Sep (337)
Nitrogen role in dissolution of iron-chromium alloys in acids, Sep (337)
Nuclear reactor water environments, SCC of Fe-Ni-Cr alloy in, Jan (1)

O

Oxygenated high temperature water, SCC of sensitized stainless steel in, Dec (451)

P

Passivity of zirconium in sulfuric acid solutions, effect of cathodic pretreatment on, Feb (59)
Pertechnetate ion, inhibition of corrosion, Sep (361)
pH changes in metal crevices, Oct (406)
pH role in SCC of Ti alloys, Nov (429)
Phosphene, inhibiting effect, May (180)
Phosphorus, effect on corrosion rate, May (180)
PITTING
Aluminum 1100, 5052, 6063, Jun (215)
Potential measurements by static potential band method, Aug (329)
Potter-Mann and Bloom oxide films grown on mild steel, significance in, Apr (133)
Potter-Mann oxide films on mild steel, significance in pitting, Apr (133)
Temperature as criterion, Jan (33)
Polarization behavior of titanium in HCl, May (188)
Polarization curves in non-Tafel region, analysis, Oct (397)
Polarization curves, shape, in vicinity of corrosion potential, Jun (245)
Polarization processes, hydrodynamic analog of, Dec (475)
Polarization resistance measurements, Tafel slopes and corrosion rates from, Oct (397)
Potential, corrosion, shape of polarization curves in vicinity of, Jun (245)
Potential measurements of pitting by static potential band method, Aug (329)
Potentiostat, mini, power source for electrochemical studies, Jun (234)
Preloading, influence on sustained load cracking of maraging steels in hydrogen, Aug (299)

Q

R

Reactor, nuclear, boiling water, electrochemical measurements of corrosion processes, Apr (123)
Rust, steel interface, role of alloying elements, Mar (95)

S

Saline solution, corrosion behavior of Ti and Ti-Ni alloys in, Oct (386)
Saline solutions, stress corrosion of ferritic and martensitic stainless steels in, Jul (268)
Sensitization of wrought high nickel alloys, Dec (470)
Silicate mortars, corrosion resistant, Jul (285)
SODIUM CHLORIDE
Benzotriazole as inhibitor for copper in, Mar (105)
Fractography of subcritical cracking of Ti in, Nov (435)
Sodium sulfate, liquid, vapor pressure of, Nov (423)
Static potential band measurements of pitting potential, Aug (329)
STEEL
AISI 304, stressed, in 5N H_2SO_4-0.1 NaCl environment selective corrosion of, Jun (237)
ASTM A517 Grade F in liquid ammonia environments, SCC of, Aug (310)
Carbon, inhibition of corrosion by pertechnetate ion, Sep (361)
Corrosion rate, increased by phosphorus, May (180)
Foil, AISI 4340, in aqueous acid solutions, organic Lewis bases effect, Apr (140)
Maraging, in hydrogen, influence of preloading on sustained load cracking of, Aug (299)
Method for predicting atmospheric corrosion in industrial environment, May (169)
Mild, anodic polarization curves, Jan (37)
Mild, cold worked, corrosion rate, Jun (223)
Mild, copper inclusions increase corrosion rate of, May (180)
Mild, effects of ClO_4^- ions on stability of anodic films formed on, Apr (143)
Mild, in chloride environment, effect of Ni additions on stress corrosion of, Nov (414)
Mild, in dilute phosphoric acid containing food additive, May (180)
Mild, in nitrate solutions, action of carbon in SCC, Jan (37)
Stainless, 304, cathodic polarization and pH changes in crevices, Oct (406)
Stainless, 304, effect of inclusions on corrosion resistance, Mar (86)
Stainless, 304, investigation of SCC in nuclear reactor water environments, Jan (1)
Stainless, 304 L, effect of high dislocation density on SCC and hydrogen embrittlement, Mar (108)
Stainless, 430, 446, effect of composition and heat treatment on structure and corrosion of, Sep (337)
Stainless, austenitic in chloride solution, composition of anolyte within pit anode of, Jan (18)
Stainless, austenitic, intergranular corrosion, chemistry of grain boundaries and relation to, Oct (384)
Stainless, corrosion resistance to liquid bismuth-tellurium solutions, Feb (75)
Stainless, in halide media, prevention of crevice corrosion by cathodic protection, Jan (28)
Stainless, iron-chromium alloys in acids, role of carbon, nitrogen, and heat treatment in dissolution of, Sep (337)
Stainless, molybdenum containing austenitic, effect of temperature on pitting, Jan (33)
Stainless, PH13-8Mo coated, galvanic corrosion of Al alloys coupled to, Jul (276)
Stainless, sensitized, in oxygenated high temperature water, Dec (451)
Stainless, stress corrosion of ferritic and martensitic, in saline solutions, Jul (268)
Tin plate manufacture, Jun (223)
STRESS CORROSION CRACKING
Aged U-4.5 Wt% Nb, Apr (153)
Alpha-brass, correlation of phase change, Sep (363)
Alpha-brass in acid sulfate solution, Aug (325)
Aluminum alloy 7075, fractography of, Aug (316)

ASTM A517 Grade F steel in liquid ammonia environments, Aug (310)
Density, high dislocation, effect on stainless steel, Mar (108)
Effects of strain rates, Jun (251)
Electrochemical testing method separating crack anode from cathode, Feb (70)
Fe and Ni alloys in sulfate solutions, Nov (442)
Fe-Ni-Cr alloys in nuclear reactor water environments, Jan (1)

Ferritic and martensitic stainless steels in saline solution, Jul (268)
Ferritic steels, Nov (414)
Galvanic interaction between active and passive titanium, Feb (56)
Hydrogen embrittlement, Jan (23)
Hydrogen embrittlement role, Jul (268)
Iron, effect of carbon content, Jan (37)

Mechanisms, of titanium-aluminum alloys in methanol-HCl solutions, Feb (47)
Method for predicting, in chemical equipment, Feb (70)
Mild steels in chloride environment, Nov (414)

Mg-Al alloy, role of stress in, Jun (251)

Mild steel in nitrate solutions, action of carbon in, Jan (37)
Stainless, Type 304 in nuclear reactor water environments, Jan (1)
Steel foil in aqueous acid solutions, effect of organic Lewis bases on, Apr. (140)
Steel, stainless, sensitized, in oxygenated high temperature water, Dec (451)
Test in high temperature electrolytes, Apr (123)
Test to evaluate susceptibility of materials to, May (205)
Ti-8Al tested in fatigue, fractography of, Jul (261)
Ti-13V-11Cr-3Al, influence of cold work on susceptibility of, Apr (146)
Ti-Al binary alloys, Jun(241)
Ti alloys, role of pH, Nov (429)
Tube electrodes for studies in high temperature water, Feb (66)
Zircaloy-2 in neutral aqueous chloride solutions, Apr (157)
Stress, factor in hydrogen embrittlement cracking, Jan (23)
Stress, role in SCC of Mg-Al alloy, Jun (251)
Sulfate solutions, SCC of Fe and Ni alloys in, Nov (442)
Sulfates in methanol solutions, inhibition of cracking of Ti-6Al-4V, Mar (112)
Surface contamination, detection of by corrosion printing, Jul (282)

T

Tafel slopes and corrosion rates from polarization resistance measurements, Oct (397)
Tantalum, corrosion resistance to liquid bismuth-tellurium solutions, Feb (75)
Tellurium, liquid solutions, corrosion of metals, Feb (75)
Temperature, criterion for pitting, Jan (33)
Temperature, high, water, SCC of sensitized stainless steel in oxygenated, Dec (451)
TITANIUM
Alloys, role of pH on SCC of, Nov (429)
Alloys, solid cadmium cracking, May (192)
Corrosion behavior in HCl, May (188)
Corrosion behavior, Oct (386)
Galvanic interaction between active and passive, Feb (56)
High strength alloy, fractographic interpretation of subcritical cracking, Nov (435)
SCC of Ti-Al alloys in methanol-HCl solutions, Feb (47)
Ti-6Al-4V, cracking in methanol solutions, Mar (112)
Ti-8Al tested in fatigue, fractography of stress corrosion in, Jul (261)
Ti-13V-11Cr-3Al, influence of cold work on SCC susceptibility of, Apr (146)
Ti-Al binary alloys, hydrogen embrittlement and SCC, Jun (241)
Ti and Ti-Ni alloys in saline solutions, factors controlling corrosion behavior of, Oct (386)
Ti-Ni alloys in acidic chloride solutions, electrochemical behavior, Feb (64)
Transpiration measurement of vapor pressure of liquid sodium sulfate, Nov (423)

V

Vapor pressure of liquid sodium sulfate, Nov (423)

W

Water, high temperature, tube electrodes for SCC and hydrogen permeation studies, Feb (66)
Water, reactor, pressurized, effect of inclusions on corrosion resistance of stainless 304, Mar (86)
Wrought high nickel alloys, sensitization of, Dec (470)

Z

Zircaloy-2 SCC in neutral aqueous chloride solutions, Apr (157)
Zirconium, in sulfuric acid, effect of cathodic pretreatment on passivity of, Feb (59)
